Finest Italian handmade

XL Cab

Brunetti company is proud to present its new speaker cabinet: the XI cab. Its structure, a 4x12", is characterized by high quality manufacturing systems matched with the most sophisticated electro-acoustic research.

XI cab uses JENSEN as a standard speaker, or CELESTION as an option. We have used all our experience in Live and Recording techniques to realize a product that can faithfully reproduce the musician style. When the electric guitar reaches its maximum efficiency, XI cab has an extremely soft and faithful frequency response. When playing in a Live situation, this particular characteristic becomes extremely important to assure the best listening to the audience. Our research and tests have been concentrated especially in this feature. When the guitarist plays together with his group he doesn't usually obtain the same performances as when he plays alone; XI cab is able to reproduce faithfully both kind of performances.

XI cab is completely hand-made assembled.

SPEAKER

CONFIGURATIONS
