LOCATION/DATE _____

This manual contains a lot of informations required to have in-depth knowledge of the equipment. Therefore we recommend that you read this manual carefully in order to use its potentials to the very best. All of our products are made on an artisan basis and therefore you may find some small acoustic and/or aesthetic differences. This is the very best guarantee of a truly homemade product.

Construction

The structure of the cabinet together with the speakers model, are extremely important to reach the final goal. The cabinet 2x12" CW212 has been designed with special characteristics and specifications in order to provide a greater amount of sound informations, therefore enhancing the colour and the quality of the Customwork amplifiers series.

We have used one of the most sturdy and compact woods currently available, plywood birch. Thickness may vary according to requirements. The entire box is extremely sturdy and stable and it has been designed to have the best quality.

It is obviously possible to match the cabinet with other amplifiers by improving performance.

The cabinet was born with **Celestion V30** speakers.

Under request we can fit every **Celestion or Jensen** model.

All the CW212 Customwork parts are partly made and totally assembled in Italy

Specifications

SPEAKERS

CONFIGURATION

Celestion Vintage 30

2x12" 120 W mono
